Education

B.voc (software development and e governance)
National pg college
2024-2027

Bachelor of computer application
Amity university online
2024-2027

Skills

- Application Development (Java, Python)
- Data Science fundamentals and analytics
- SQL and Database Systems (design, queries, optimization)
- Problem-solving and logical thinking
- Continuous learning and adaptability

About Me

I am a passionate and driven technology enthusiast with a strong interest in application development, data science, and database management. Currently exploring Java and Python, I enjoy building efficient, user-focused solutions while deepening my expertise in programming and modern software practices. Skilled in SQL and database systems, I bring a solid foundation in designing, managing, and optimizing data-driven applications. My goal is to leverage my technical skills and curiosity to contribute to innovative projects that combine robust development with insightful data analysis

Work Experience

APPLICATION DEVELOPMENT INTERN 15/09/2025 to 15/10//2025
CODEC TECHNOLOGIES PVT. LTD

As application development intern this experience has deepened my understanding of software development and fueled my passion for building impactful solutions.

DATA SCIENCE INTERN 10/09/2025 to 10/10/2025
HEX SOFTWARES

throughout this internship i gained valuable experience in data anallysis , visulaization, and insights generation using modern data science tools and techniques

PROJECTS

- spend sniper app
- covid 19 dsts analysis
- titanic survival prediction
- movie rating analysis
- ML workflow
- EDA
- housing price prdiction
- insurance charges analysis
- loan eligebility prediction model
